

LAWN MAINTENANCE: WHAT TO DO IN THE SPRING?

Your lawn needs love in the spring. It may have turned yellow or be covered in debris. You know you have work to do, but you might be asking: What do I do? How? Where do I start? You'll find the answers to all your questions right here.

CLEANING AND DETHATCHING

Spring is a time for cleaning – inside and out! Where to start? Remove all debris and excess thatch from the lawn base. This is an excellent way to prepare for a lush green summer!

REPAIRING DAMAGED AREAS

Winter conditions or harmful insects may have affected your lawn. Damaged patches must be repaired for a uniform result.

> 6 easy steps to repair damaged lawns.

AERATING

Snow accumulation, rain, vehicle parking and foot traffic all cause the lawn to become compacted, which prevents it from breathing. Fortunately, there is a solution: aeration.

TOP-DRESSING

Sometimes, fertilizing isn't enough, and the lawn needs an additional boost to thrive. Top-dressing is a great way to improve your lawn's health – naturally!

> In the spring and fall: top-dress your lawn.

FERTILIZING

Over the winter, your lawn uses up all its energy reserves. That's why in the spring, it needs fertilizer to quickly grow and turn green. This is the secret to your lawn being the envy of your neighbourhood.
